## AEROSOL TOPS PRESS

The cost effective way of producing aerosol tops either from scrolled or straightside strips in one machine. The strips in 2-out configuration is forwarded by mechanical pawl rail. Shells are punched in the shell tool and deposited in to the transfer system. The curling operation is done by the die set.

### TECHNICAL DATA

Maximum Output : 170 Tops / Minute

Diameter Range : 45 - 65 mm

Number of Lanes : 2

Number of Stations : 1+7

Main Drive Motor : 15 kw
